

Q Schools App - Free

Get information conveniently to your Smart Phone using the QSchools App. You can see instantly the newsletter, news stories, calendar, tuckshop, special messages and more. Our school also uses the notifications function to send messages.

** After downloading the app, search for our school and tap the star to add our school to your favourites.

Also remember to check that your settings are set to allow notifications if you wish to receive these valuable updates.

QSchools App

Our school uses the QSchools App to provide notifications to parents directly to their Smart Phones. We will also be increasing the use of this app as a means of communication for our school families.

Newsletter Online - Our school hands out newsletters online through both the school website and the Schools App. We notify through the QSchools app when a new newsletter is released. If you need a paper copy, the newsletter can be collected from the office foyer.

Download the app to
stay in close touch
with the school.

Make sure you have the notifications checked in the settings in your Smart Phone, as this will be an important tool to receiving messages such as:

- ▶ "Just a reminder there is swimming today."
- ▶ "Report Cards are being handed out today."
- ▶ "Just a reminder that it is free dress today."
- ▶ "Don't forget your costumes for the book week parade."
- ▶ "Books in Home Parade - Parents welcome"

This is an amazing tool for communication and if you have any questions, or you are not sure how to set it up, please check in with the office and a staff member will give you a hand.
